## Summary

---

Over four years crafting standout digital experiences. I focus on blending design and functionality to create user-friendly solutions that leave a lasting impression.

User-first approach, I continuously seek to improve and innovate, ensuring every project delivers both performance and impact.

## Education

---

### University of Cordoba

*in Computer Science*

*Cordoba, Colombia*

*Feb 2017 – May 2022*

- Meritorious Thesis: Software project focused on the automatic detection of learning styles, aimed at improving the personalization of educational processes through computational techniques.

## Experience

---

### Frontend Engineer

*LUM Logistic*

*Remote, Colombia*

*Nov 2023 – May 2025*

- Designed and implemented scalable frontend architectures for logistics and resource-management systems.
- Optimized application performance through code-splitting, memoization, and rendering optimizations.
- Collaborated with backend, product, and operations teams to define technical requirements and delivery scope.

### Lead Frontend Developer

*Hi Beauty*

*Montería, Colombia*

*Oct 2022 – Oct 2023*

- Led frontend architecture and technical direction for the company's website and internal platforms.
- Defined the frontend tech stack, project structure, and tooling (linting, formatting, build processes).
- Designed reusable component libraries and established design system foundations.
- Coordinated development workflows, reviewed pull requests, and mentored team members.
- Worked closely with stakeholders to translate business needs into technical solutions.
- Ensured application maintainability, scalability, and performance across multiple deployments.

### Frontend Developer

*StartupsLab Agency*

*Montería, Colombia*

*May 2020 – Sept 2022*

- Implemented responsive and accessible UIs using modern frontend frameworks.
- Integrated third-party services and APIs into client-facing applications.
- Collaborated in agile environments with designers, backend developers, and product teams.
- Contributed to internal tooling and shared components to accelerate development across projects.

## Projects

---

### HiBeauty — Mobile App

*Oct 2022 – Oct 2023*

Flutter mobile app with a scalable architecture, reusable widgets, and API integration.

- Developed and maintained a cross-platform mobile app built with Flutter.
- Implemented reusable, widgets-based UI architecture across mobile platforms.
- Integrated APIs and optimized performance, responsiveness, and overall user experience.

## Skills

---

**Languages:** JavaScript, TypeScript, Dart

**Libraries & Frameworks:** Node.js, React, Next.js, Astro.js, Flutter, Tailwind CSS, Nest.js
