Summary

Crafting standout digital experiences. I focus on blending design and functionality to create user-friendly solutions that leave a lasting impression.

User-first approach, I continuously seek to improve and innovate, ensuring every project delivers both performance and impact.

Education

University of Cordoba

in Computer Science

Cordoba, Colombia

Feb 2017 – May 2022

- Meritorious Thesis: Software project focused on the automatic detection of learning styles, aimed at improving the personalization of educational processes through computational techniques.

Experience

Software Developer

LUM Logistic

Remote, Colombia

Nov 2023 – May 2025

- Designing and implementing specialized systems for seamless logistics management within Scrum-based agile environments.
- Developing scalable, well-architected APIs using Nest.js to support complex business logic, aligned with iterative and incremental delivery.
- Enabling reliable system integration and efficient communication between services across cross-functional Scrum teams.
- Optimizing workflows to improve operational efficiency and resource utilization through continuous feedback and sprint-based improvements.
- Applying best practices in software architecture to ensure maintainability and long-term scalability while adhering to Scrum principles and ceremonies.

Lead Software Developer

Hi Beauty

Montería, Colombia

Oct 2022 – Oct 2023

- Led frontend architecture and technical direction for the company's website and internal platforms, while collaborating on backend services built with Nest.js and enhanced with Redis for caching and performance optimization.
- Defined the frontend tech stack, project structure, and tooling (linting, formatting, build processes), ensuring seamless integration with Nest.js APIs and Redis-backed data flows.
- Coordinated development workflows, reviewed pull requests, and mentored team members across frontend and backend boundaries, promoting best practices in scalability and performance.
- Worked closely with stakeholders to translate business requirements into scalable technical solutions, including API design, backend architecture with Nest.js, and Redis-based caching strategies.

Frontend Developer

StartupsLab Agency

Montería, Colombia

May 2020 – Sept 2022

- Implemented responsive and accessible UIs using modern frontend frameworks.
- Integrated third-party services and APIs into client-facing applications.
- Collaborated in agile environments with designers, backend developers, and product teams.
- Contributed to internal tooling and shared components to accelerate development across projects.

Skills

Languages: HTML, CSS, JavaScript, TypeScript, Dart

Libraries & Frameworks: Node.js, React, Next.js, Astro, Tailwind CSS, Flutter, Nest.js, MongoDB, Redis
