Summary

Crafting standout digital experiences. I focus on blending design and functionality to create user-friendly solutions that leave a lasting impression.

User-first approach, I continuously seek to improve and innovate, ensuring every project delivers both performance and impact.

Education

University of Cordoba *Montería, Córdoba*
in Computer Science and Audiovisual Media *Feb 2017 – May 2022*

- Meritorious Thesis: Software project focused on automatic detection of learning styles, aimed at improving the personalization of educational processes through computational techniques.

Experience

Software Developer Ssr *Bogotá, Colombia*
Banco Caja Social *Mar 2026 – present*

- Develop and maintain React and Next.js applications for internal tools and client-facing banking platforms, with a focus on performance, accessibility, and maintainable component architecture.
- Build backend services and REST APIs with Nest.js that support core banking operations, ensuring security, reliability, and clear service contracts.
- Design, implement, and maintain production conversational bot flows in Genesys Cloud Architect, integrating them with internal services to automate customer interactions and reduce agent workload.

Frontend Engineer *Remote, Colombia*
LUM Logistic *Nov 2023 – May 2025*

- Designed and built frontend applications for logistics management, turning complex operational processes into clear, efficient user workflows.
- Integrated web applications with Nest.js REST APIs, collaborating with backend engineers to define data contracts and keep services consistent.
- Identified bottlenecks in day-to-day operations and shipped iterative improvements based on user feedback, increasing team efficiency.
- Applied solid architecture and code quality practices to keep the codebase scalable and easy to evolve within an agile, cross-functional team.

Frontend Developer *Montería, Colombia*
StartupsLab Agencia *May 2020 – Sept 2022*

- Built responsive and accessible user interfaces with modern frontend frameworks for clients across multiple industries.
- Integrated third-party services and APIs into customer-facing applications.
- Worked in agile teams alongside designers, backend developers, and product owners to deliver projects on schedule.
- Contributed to shared components and internal tools that accelerated delivery across projects.

Skills

Languages: HTML, CSS, JavaScript, TypeScript, Dart

Libraries and Frameworks: Node.js, React, Next.js, Astro, Tailwind CSS, Flutter, Nest.js, MongoDB
