Summary

Crafting standout digital experiences. I focus on blending design and functionality to create user-friendly solutions that leave a lasting impression.

User-first approach, I continuously seek to improve and innovate, ensuring every project delivers both performance and impact.

Education

University of Cordoba *Montería, Córdoba*
in Computer Science and Audiovisual Media *Feb 2017 – May 2022*

- Meritorious Thesis: Software project focused on automatic detection of learning styles, aimed at improving the personalization of educational processes through computational techniques.

Experience

Software Developer Ssr *Bogotá, Colombia*
Banco Caja Social *Mar 2026 – present*

- Building and maintaining frontend applications using React and Next.js, delivering responsive and performant user interfaces for both internal tools and client-facing banking platforms.
- Development of backend services and REST APIs using Nest.js to support banking operations and internal platforms.
- Exploring Genesys Cloud for automated bot flows and customer interaction design as part of continuous learning initiatives.

Frontend Engineer *Remote, Colombia*
LUM Logistic *Nov 2023 – May 2025*

- Design and implementation of specialized systems for smooth logistics management, working in agile environments.
- Working with REST APIs built with Nest.js, integrating frontend applications with backend services to support business requirements.
- Enablement of reliable integrations and efficient communication between services within cross-functional teams.
- Optimization of workflows to improve operational efficiency and resource utilization through continuous feedback and improvements.
- Application of software architecture best practices to ensure maintainability and long-term scalability.

Frontend Developer *Montería, Colombia*
StartupsLab Agencia *May 2020 – Sept 2022*

- Implementation of responsive and accessible user interfaces using modern frontend frameworks.
- Integration of third-party services and APIs in customer-oriented applications.
- Collaboration in agile environments alongside designers, backend developers, and product teams.
- Contribution to internal tools and shared components to accelerate development across projects.

Skills

Languages: HTML, CSS, JavaScript, TypeScript, Dart

Libraries and Frameworks: Node.js, React, Next.js, Astro, Tailwind CSS, Flutter, Nest.js, MongoDB
